Contents of this Statistical Yearbook may be quoted provided the source is clearly indicated.

Price: ANG 25.00

### **Preface**

The Department of Statistics (STAT), a newly established department within the Government organization, is an independent entity, which collects, processes and distributes statistical information for the benefit of government organizations, science, private agencies and the general public.

This Year Book edition is the first since the department's inception. Previously the yearbook was published by the Central Bureau of Statistics. However, since the dismantling of the Netherlands Antilles, the Department of Statistics is now the publisher of this book, which provides more relevant information about St. Maarten in an expanded form but has the same style, content, and format.

The publication consists of the latest available compiled data on population, health, education, labour, tourism, utilities, foreign trade, transport and communication, national accounts, prices, social affairs and justice.

The Statistical Yearbook will be published annually by STAT in order to inform our users of the different developments within the St. Maarten society. It is hoped that this publication will be a valued reference for business owners, managers, consultants, students, researchers, visitors, public servants, potential investors, and the general population.

The department thanks those persons from the public and private sectors who have contributed to the publication and making of this yearbook a success. In addition, we welcome your comments or suggestions on how this publication can be enhanced to better serve your needs. Kindly direct such to: <a href="mailto:statinfo@sintmaartengov.org">statinfo@sintmaartengov.org</a>

Makini K. Hickinson Department Head

# Map of Dutch St. Maarten

#### About St. Maarten

St. Maarten, located at 18°01′N 63°03′W, is one of the southern islands of the Lesser Antilles, within the archipelago of the West Indies. Its closest neighbouring islands include Anguilla, St. Barths, Saba, St. Eustatius, St. Kitts and Nevis; and it is situated some 200 miles East of Puerto Rico.

St. Maarten/St. Martin is partly Dutch (southern-side) and French (northern-side). After being part of the Netherlands Antilles for over 50 years, Dutch St. Maarten became a constituent country within the Kingdom of the Netherlands on October 10<sup>th</sup> 2010, essentially becoming a constitutionally equal partner with Aruba, Curação, and the Netherlands.

St. Maarten now has its own government and parliament. The Kingdom Government remains responsible for defence and foreign affairs. The Queen of the Netherlands is Head of State and is represented locally by the Governor. Dutch and English are the official languages on St. Maarten.

St. Maarten is a small, open-island economy, driven primarily by the tourism industry. Each year approximately 1.9 million tourists visit the island.

The tourism industry accounts for the greatest contribution to the island's Gross Domestic Product and employment. Apart from the mainstay industry (stay-over & cruise tourism sectors), economic diversification is being sought in the Marine & Yachting sector, Financial services and E-zone.

The Netherlands Antillean guilder is still used on St. Maarten, and the US dollar is widely accepted at a rate of US\$1=ANG1.80.

The 37-square-mile island of St. Maarten was first settled by the Arawaks and was discovered by Christopher Columbus on behalf of Spain in 1493. Columbus sighted the island on November 11th, the holy day of St. Martin of Tours, and so named the island after him. For the next 150 years the island was passed between Holland, England, France and Spain.

The old stone forts that guard many of the island's inlets are proof of the island's turbulent past. In 1648 St. Maarten was peacefully divided between Holland and France, and today is the smallest landmass in the world to be shared by two sovereign nations.

# 1. Climate & Area

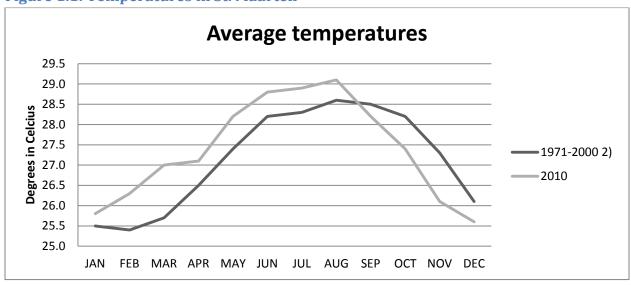

St. Maarten is characterized by a marine climate. There is a relatively dry season (January-April) and a rainy season (August-December), with moderate to fresh east to north easterlies. The island enjoys a mild tropical climate, with average temperatures of around 27 °C or 81 Fahrenheit. August is usually the warmest month.

The seawater temperature around the island averages around 27.2 °C.

St. Maarten is located within the Atlantic hurricane belt; and on average experiences major-hurricane conditions at least once every 4 - 5 years.

The data observed in table 1.2 has been collected at the Princess Juliana International Airport. Values for the year 2010 were received from the Meteorological Service of St. Maarten, whereas the historical observation series is that of the Meteorological Service of the former Netherlands Antilles.

# 2. Population

During the Population Census of 2001, the total population of Dutch St. Maarten was approximately 30, 594 persons. In April 2011, a Population Census was repeated. The data will be published during the last half of 2012.

Below is an estimate of the population in the years between censuses and is based on annual mutation files (i.e. the number of births, deaths, registered immigration & emigration) from the Civil Registry office of St. Maarten, using the 2001 Census population count as the base year.

The St. Maarten population can also be obtained from the Civil Registry, however traditionally this figure is higher than the population count due in part to an over-statement in figures at the civil registry of persons who have emigrated but remain in the system.

#### 3. Elections

The Kingdom of the Netherlands has recently undergone a process of constitutional reform, which has now reached fruition. The changes concern the Netherlands Antilles, a country that until recently was made up of the islands of Curaçao, Sint Maarten, Bonaire, Sint Eustatius and Saba. As of 10-10-'10 the Netherlands Antilles has ceased to exist.

In the new constitutional structure, Curaçao and Sint Maarten have acquired the status of countries within the Kingdom (like the Netherlands Antilles and Aruba before the changes). Thus, as from 10 October 2010, the Kingdom consists of four, rather than three, equal countries: Aruba, Curaçao and Sint Maarten are not Dutch overseas dependencies, but full, autonomous partners within the Kingdom, alongside the Netherlands, and each enjoys a high degree of internal autonomy.

Sint Maarten has its own government and parliament. Together, these institutions are empowered to enact legislation in regard to the countries' own affairs. As of October 10, 2010, St. Maarten is now governed by its own Constitution and the following institutions of government: Governor as Head of State, Parliament, and the Council of Ministers headed by the Prime Minister.

The parliament is the highest legislative body of country St. Maarten and represents the entire population of the Dutch side of the island. The parliament consists of 15 members who are elected for a four-year period.

The council of ministers comprises of seven ministers. The ministers are answerable to the parliament. The prime minister chairs the council of ministers. The council of ministers shall debate and determine government policy in order to promote the cohesion of that policy.

### 4. Public Health

Health statistics presented in this section have been compiled from the Ministry of Public Health, the Epidemiology & Research unit of Curacao, the St. Maarten Medical Centre and the Census 2001 results.

The statistics provided here relate to:

- State of health of Sint Maarten
- The health facilities
- The response to health assistance calls

Statistics on Fire & Medical Emergency Services have also been included. The categorisation for table 4.8 is as follows:

**Category A**: A situation where there is acute danger for the life of the patient or the victim or that such risk is (probably) present and can only be excluded by the ambulance team on the spot. The response norm is 15 minutes.

**Category B**: A situation where there is no acute danger for the life of the patient or the victim with indications that ambulance care is needed as soon as possible. The response norm is up to 30 minutes.

**Category C**: A situation where the state of health of the patient or the victim will not be adversely affected by not granting immediate ambulance care (in this case the ambulance is pre-ordered).

# 5. Education

The educational system in Sint Maarten comprises public and private schools. The information presented in this section is compiled from the Department of Education who is in charge of the public school system.

Some schools have adopted the Dutch school system while others maintain the American system. Comparing grades consistently is thus a challenge.

This section offers information on:

- The public school population
- The enrollment at the University of Sint Maarten
- The number of teachers

### 6. Labour

Labour market data for St. Maarten presented in this section is derived mainly from the Labour Force Surveys (LFS). The LFS is a sample survey among households, with the aim to measure recent developments on the labour market. The most important concepts in this survey are the unemployment rate, developments in the employed and unemployed population, and the degree of participation.

The last LFS was conducted in 2009, and will be repeated annually as of 2013 by STAT.

### **Employed population:**

All persons 15 years and older with a job or their own business or who during the week prior to the survey, worked 4 hours or more for a remuneration.

#### **Unemployed Population:**

All persons 15 years and older who during the survey were unemployed, were actively looking for work the month prior to the survey and who can start working within 2 weeks, should there be a job available.

# Labour Force (also called the economically active population)

The number of employed and unemployed added together.

#### **Economically not active**

All persons 15 years and older who are neither employed nor unemployed.

#### **Unemployment rate**

The number of unemployed divided by the labour force multiplied by 100.

#### Youth unemployment rate

The unemployment rate of persons in the age group 15 to 24.

#### **Participation rate**

The labour force divided by the total population multiplied by 100. It indicates what proportion of the total population is economically active.

# 7. Tourism

Tourism is the leading export service for Sint Maarten. Sint Maarten identifies three different types of tourists namely, cruise tourist, stay-over tourist and marine tourist.

Sint Maarten offers a unique tourist experience with its Dutch/French divide, strategic location complemented by state-of-the-art airport & harbour facilities, culinary variety and lots of beaches, nightlife & shopping.

This section offers a look at:

- Hotel occupancy rates
- Tourist volumes (Stay-over & cruise sectors)

## 8. Utilities

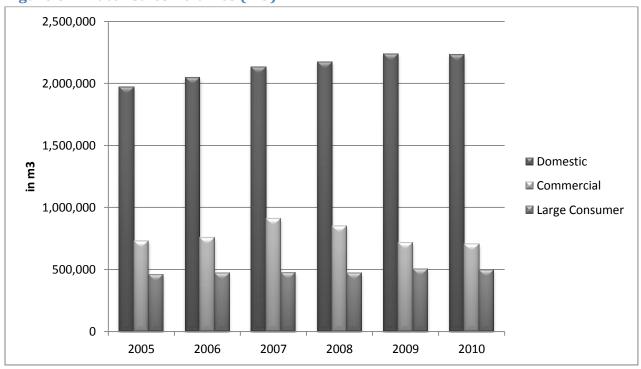

NV GEBE, or Gemeenshappelijk Elektriciteitsbedrijf Bovenwindse Eilanden, is the sole utility company producing and distributing electricity on St. Maarten, Saba and Statia and distributing water on St. Maarten and Statia. GEBE is owned by shareholders. A Shareholder Foundation was established in 1996 and 100% of the shares, which are owned by the three islands, were transferred to the shareholder foundation. Saba and St. Eustatius each have one representative on the Shareholder Foundation while St. Maarten has three.

This section looks at the usage of water and electricity with figures provided by GEBE N.V.

# 9. Foreign Trade

The foreign trade statistics presented in this section are based on the results of the annual Import- Export Survey conducted by the Department of Statistics. Sint Maarten is a free trade country therefore limited information on the value of commodities being traded are available through the Customs Department.

The commodity classifications for both the import and export trade statistics are based on the Standards International Trade Classification (SITC).

This section deals with statistics on import and export trade segmented by SITC section and industry.

SITC Section	Description	2007 ('000) Ang.	2008 ('000) Ang.	2009 ( 000) Ang.

# 10. Transport and Communication

Included in this section are various aspects of transport & communication namely:

- Registered vehicles
- -Driver License examination results, for which the following categorisations are made:

#### Category A:

A motorcycle without side-car, with an engine of more than 250cc with manual transmission. Helmet is compulsory. (Changing gear with the foot.) (18 years and up)

#### Category B:

A motor vehicle designed to transport people with no more than 8 seats excluding the driver or a motor vehicle designed to transport cargo with a total weight of no more than 3500 kg. (Manual transmission)(18 years and up)

## Category **C**:

A truck with a weight of more than 3500 kg. (21 years and up)

#### Category **D**:

A bus with more than 8 seats excluding the driver. (21 years and up)

### Category E:

A trailer heavier than 750 kg., where the driver has a valid driving license category B, C or D. (21 years and up)

- Number of Traffic accidents
- Aircraft, Passenger & Air cargo movements at Princess Juliana International Airport, St. Maarten

# 11. National Accounts

Economic activities are characterized by numerous transactions among the government, the financial and nonfinancial sector, the household sector, non-profit institutions and the rest of the world.

National accounts provide an overview of the economic process in a certain year.

The following table has been compiled on the basis of the System of National Accounts 1993 (SNA 93), and refers to estimates.

#### 12. Prices

Prices of goods and services are constantly subject to change for various reasons. Price indices aim at providing a summary overview of these prices changes. The Consumer Price Index (CPI) reflects the changes in the prices of a basket of goods and services as consumed by family households in a certain base period. The CPI is widely used as an indicator of inflationary trends in the economy and serves as a cost-of-living index.<sup>1</sup>

The Household Budget Survey (HBS) is the basis for calculating the consumer price index on St. Maarten. This survey was last conducted by CBS-Neth. Antilles in 2004/2005. The HBS is scheduled to be repeated by STAT in 2013 after which the CPI will be rebased.

The tables presented in this section comprise the historical end-of-year indices and consumer price index per expenditure category.

<sup>&</sup>lt;sup>1</sup> Text quoted from previous Yearbooks of CBS-Neth. Antilles

## 13. Social Affairs

The statistical data on social affairs gives an indication of the way in which people are accommodated within the social security system. Within the social security system each family is guaranteed at least a minimum of resources to meet its basic needs.

The minimum wage per hour for Sint Maarten per September 1<sup>st</sup>, 2011 is Naf 7,96. This wage is valid for workers of 21 years and older. For the age group of 16-20 years a youth minimum is applicable for each specific age: 16/17:65%; age18:75%; age19:85% and age 20: 90% of the indicated minimum age.
